***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 09/04/07 has been entered.

Applicant's amendments and remarks filed 09/04/07 have been received and reviewed. Claims 1, 4-6, 8 and 10-12 are now pending in this application.

The claims in this application do not commence on a separate sheet or electronic page in accordance with 37 CFR 1.52(b)(3). Appropriate correction is required in response to this action. Claim 12 is incomplete in the separate claims sheet and part of it is in the Remarks section.

***Claim Rejections - 35 USC § 112***

Claims 1, 4-6, 8 and 10-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

i) The specification at pages 27 and 28 clearly shows the three examples wherein the carbon is substituted by a hydroxy group and the nitrogen by a carbonyl group (nitrogen protection group). The phrase in claim 1 which states N<sub>10</sub>-C<sub>11</sub> prodrugs is unclear. Appropriate clarification and consistency is necessary. The groups in claim 12 are not written properly because there appears to be one point of attachment and this does not reflect the actual derivatives.

Art Unit: 1624

ii) In claim 1 in the definitions of  $R^6$ ,  $R^7$  and  $R^9$  the group  $NHRR'$  is present. Such a group, when a radical, would have a positive charge. A counter ion is therefore required.

iii) In claim 11, an ester or thioester on  $C_{11}$  is improper because these are classes of compounds and not radicals. Applicants intention appears to have a substituent, such as, an alkoxycarbonyl. Appropriate correction is required.
